

Reserve METOC Support to the Navy's Target Area METOC (TAM) Capability Needs

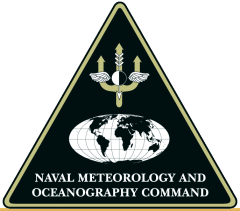

Project Officer: CDR Edmund Cataldo
Date: 05/01/2004

TAM

VISION

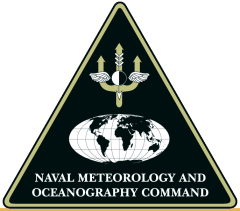

To provide TAM qualified Reservists who can efficiently and effectively support emergent Active Component METOC requirements and exercises

TAM

- CONCEPT OF OPERATIONS/UTILIZATION

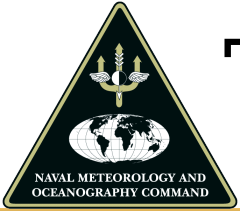

- TAM support to be forward deployed,
- Add on-site intelligence and data to forecasts provided by the centers, directly to the warriors.
- Will be needed in a surge capacity on a short fuse request, for short term support.
- Numerous exercises scheduled throughout the year need support from the Reserves.

TAM Requirements

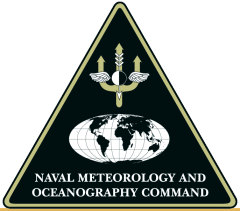

Summary

- Clearance Required: TS/SCI, however can train using Interim
- Prerequisites: 7412 NEC desired
- Justification: operational support to Sea Power 21, specifically Sea Strike (Expeditionary Strike Groups)
- Commitment: minimum 3 years, prefer 5 years, due to training requirements and time/money to obtain TS/SCI
- Support to: NPMOC Pearl Harbor, possible support in the future to NLMOC Norfolk

TAM Training Requirments

- Training - OJT at NPMOC currently takes about 2 weeks
- Could include training at the Warfighting Support Center (WSC) at NAVO
- Satellite Interpretation course
